News Release

For Immediate Release

Avangard Innovative LP Acquires Avangard Innovative Safety Products, Expanding Its Group of Green Companies.

HOUSTON - OCT. 27, 2009 - Avangard Innovative today announced the integration of Avangard Innovative Safety products a manufacturer, distributor, and importer of hand protection & safety products. Avangard Innovative Safety Products division has a complete line of industrial and general purpose gloves and a wide range of safety products that satisfy protection needs.

Avangard Innovative Safety Products (AISP) has been manufacturing gloves since 1998. The US operation headquarters has been located in Houston, Texas since 2001.

AISP designs the most innovative and form fitting gloves, and deploys the world's most advanced knitting technology to achieve the ultimate natural fit in hand protection.

"AISP is proud to offer CROC TM, a Trade Mark which constitutes a fiber evolution with unsurpassed characteristics, uses and benefits", said Rick Perez, Avangard Innovative CEO.

CROC Gloves combine a newly engineered fiber with specialty stainless steel that provides enhanced abrasion and high cut resistance; CROC TM is the best market alternative in terms of cut protection and value.

AISP unique knitting processes encompass all available knitted products of seamless gloves and other safety products, ranging from personalized work gloves, general purpose gloves, protection sleeves, Power Band TM, etc. to highly specialty products made of recyclable materials, Nitrile, Latex, PVC, etc. covering a wide variety of safety applications.
